- **wishbox**
Wishbox caters to startups & entrepreneurs in search of a friendly, flexible place that falls somewhere between home & office where they can meet, brainstorm, share & develop ideas.

luxembourg's startup ecosystem.

where innovation is contagious.

luxembourg: a startup's gateway to europe.

Of all Luxembourg's success stories, the explosion of its startup scene belongs near the top. A smattering of entrepreneurs grew into a roaring community of global influencers.

With a strong foundation of funding, infrastructure & partnerships, success takes on a domino effect. By joining forces, Luxembourg's ecosystem ensures that startups have somewhere to turn at every step: incubation, acceleration, scaling & beyond. We never stop working to meet the specific needs of young companies, from networks to office spaces to financing. As seen through the plethora of public & private initiatives, Luxembourg cherishes its startups.

Because of the Grand Duchy's small size, our startups think globally from the start. Digital Luxembourg aims for national change, so we back projects with high-impact potential. For the smartest strategy, we bring the heads of local incubators together on a regular basis. This pooled perspective closes gaps in the ecosystem & shapes Luxembourg's global positioning.

luxembourg's startup ecosystem.

a map of the accelerators, incubators & co-working spaces dedicated to helping our startups thrive.
